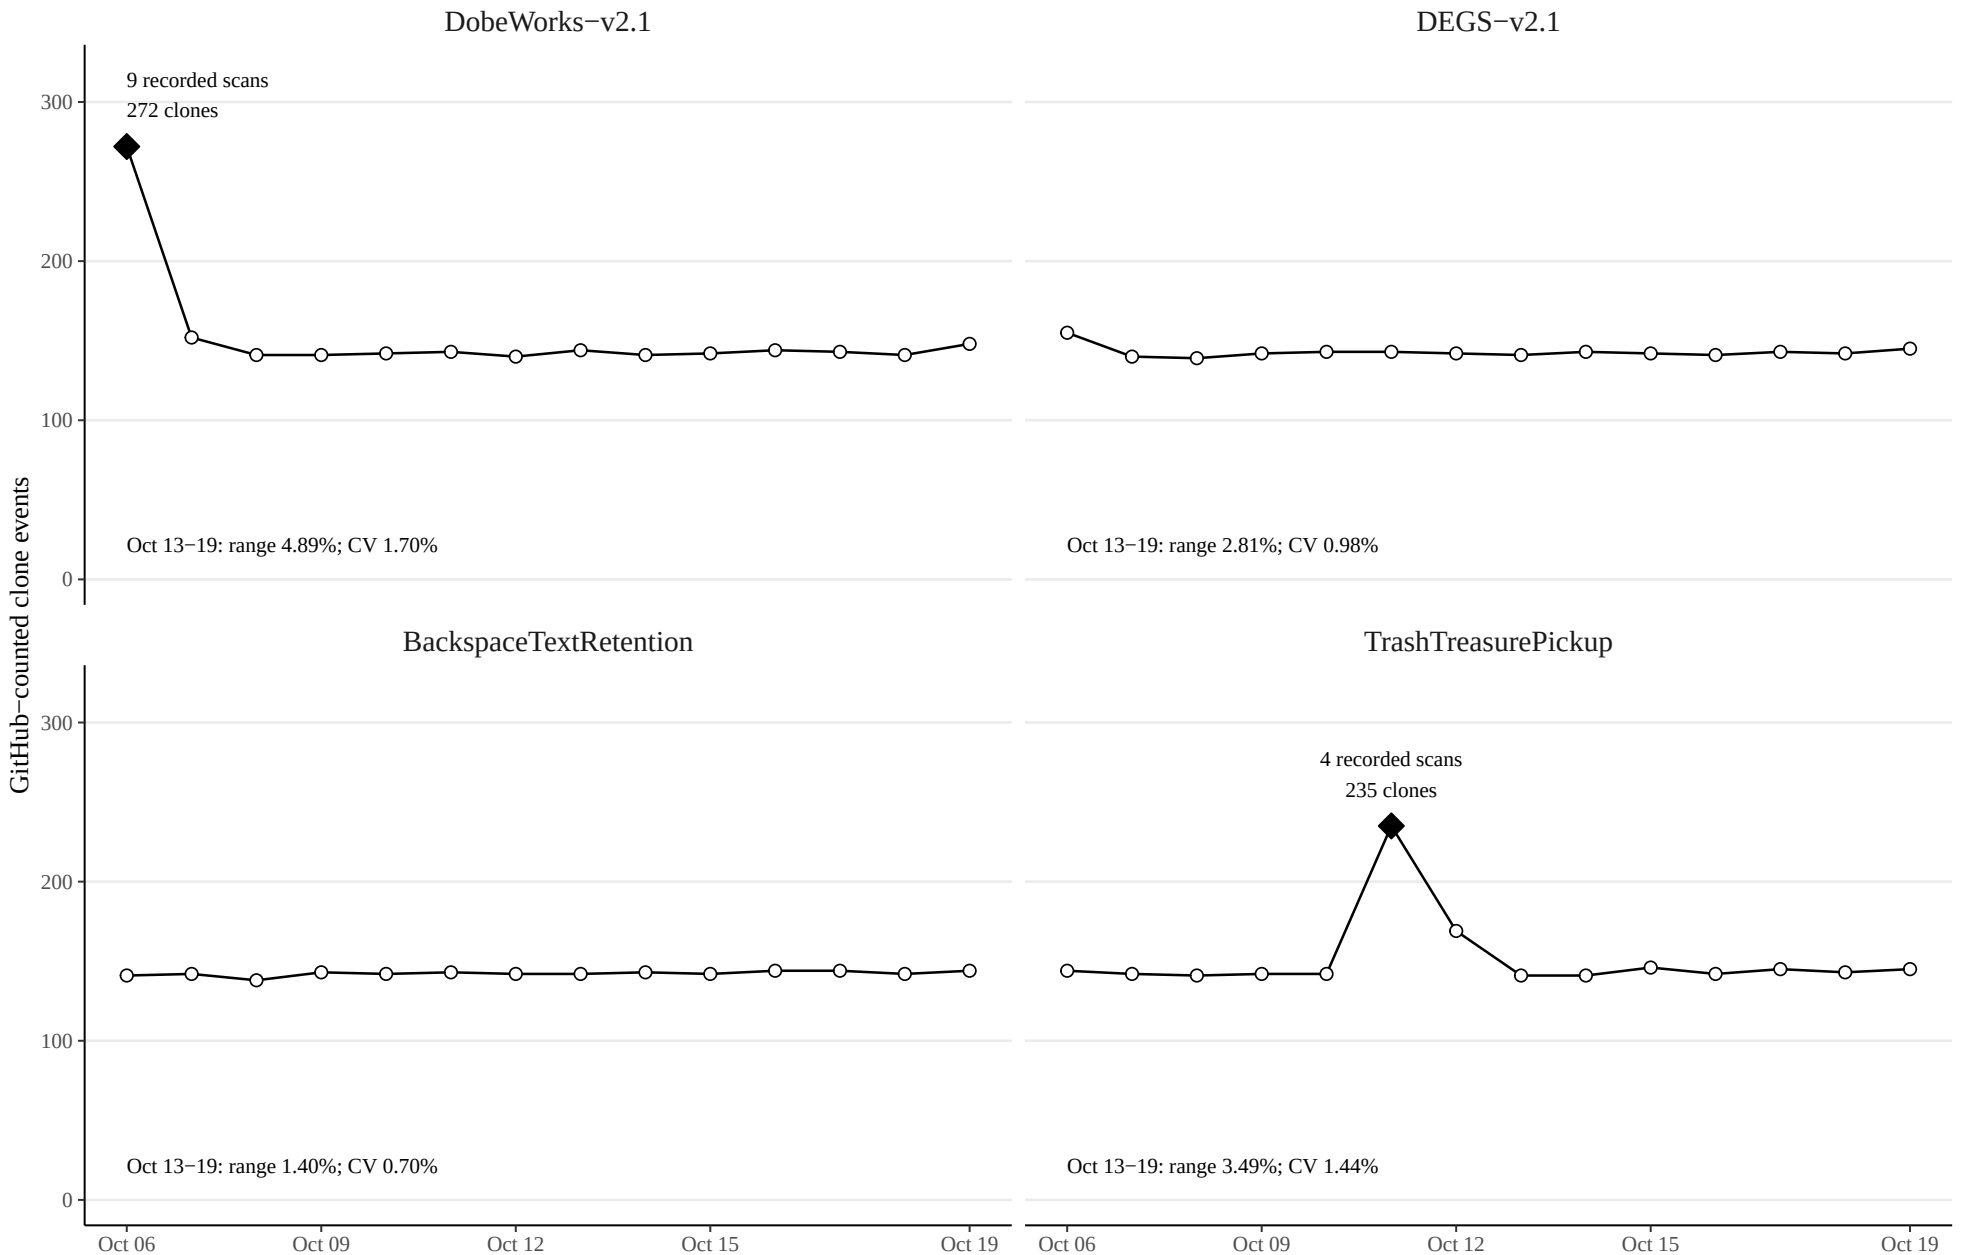
Recorded Security Cloud scans align with the two large clone spikes

GitHub clone events and successful Codex Security commit−scan jobs, October 6−19, 2026 (UTC)



Filled diamonds mark dates with recorded scan jobs. Grey shading begins after the final recorded scan on October 11; the plateau continues.
The connected history contains 99 successful jobs in total. Range = 100 x (maximum − minimum) / mean; CV uses sample SD. Shared axes include zero.
